

# Recycled Plastic

For the real world.

## No-worry recycled plastic

ANOVA® is committed to creating high-design, fine-quality products that also help customers achieve their goals in sustainability and LEED certification.

With superior structural properties and premium recycled plastic, Anova's products stand the test of time. No matter what the weather or conditions, this recycled plastic is completely maintenance-free.

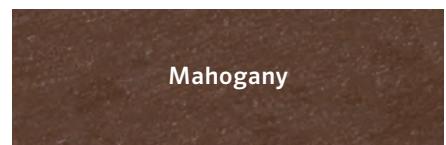

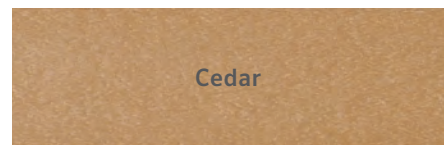

- Made of 95% recycled content by weight
- 100% recyclable manufacturing process
- 90% of the material is from post-consumer content
- Fade-resistant color is uniform throughout the plank
- Tested to the same weight standards as our steel products: 200 pounds per linear foot

## Warranty

20-year limited structural warranty

## Colors

These two classic colors resist fading and retain their beauty without the need for staining or painting.

# Anova vs. the competition:

## THEIRS:

Competitor's bench is splitting, fading, and cracking.

## OURS:

Anova bench is still beautiful after withstanding three Midwest winters.

Anova's premium recycled plastic will not split, rot, or crack over the years — guaranteed. Steel frames prevent planks from sagging.

Inferior recycled plastic is prone to degradation from the elements, as well as an unattractive "dog bone" look. This is due to a gassing effect that is inherent to many competitors' manufacturing processes, and results in voids located in the middle of the material.

### Inferior Recycled Plastic

Off-gassing interior results in a sunken appearance

### Anova Recycled Plastic

Pressed manufacturing process eliminates voids
